

Montrose Environmental Group

Presents

Dr Mary Cole

*Plant Pathologist, microbiologist,
Director of Agpath, International
speaker*

The role of soil biota in establishing a sustainable urban environment

Dr Mary Cole is a globally recognised plant pathologist and microbiologist. She holds a PhD in Plant Pathology and has over 50 years of experience covering research, education and consultancy in soil health and sustainable agricultural practices. In 1980 she started her own consultancy company Agpath, which in addition to water and soil testing specialises in biological solutions, soil ecology and organic viticulture. Mary was awarded the 2025 Victorian Agrifutures Rural Women's Award for her work and research into sustainable farming practices.

Dr Mary Cole's passion for sustainable agriculture and healthy soils stems from her father's love of nature, land preservation and respect for indigenous practices in caring for country.
